
speedikon FM AG receives funding from the Hessian State Chancellery for pioneering Chat4BI project

speedikon FM AG has received funding from the Hessian State Chancellery for its "Chat4BI" project, where they will develop a chatbot for the secure use of artificial intelligence (AI) in companies. In collaboration with the AI consulting firm Innomatik, prototypes are to be developed that enable users to access company data using natural language. The project aims to set new standards in the integration of AI.

X

Bensheim, Germany, December 11, 2023 – The software provider speedikon FM AG announces that its project “Chat4BI - Chatbot for Business Intelligence” has been classified as eligible for funding by the Hessian State Chancellery. The groundbreaking project, which is supported by the Distr@I funding program of the Digital Hessen department, aims to identify secure and reliable applications for IAi in the form of a chatbot for sensitive company data.

In cooperation with the experienced team at the AI consulting firm Innomatik, speedikon FM AG is planning to develop joint prototypes in the coming year. The aim is to enable users to access database information via natural language input in the future. A possible first prototype could, for example, be queries regarding the number of free workstations on the individual floors of an office building. This approach

enables users to retrieve the information they need in a simple and intuitive way, as they are used to from familiar chat applications.

“Thanks to the support of the funding program Distr@I under the Hessian State Chancellery, we are taking an important step towards not only a more secure, but also a more efficient use of AI in companies via natural language,” says Adrian Merkel, CEO of speedikon FM AG.

The German company is looking forward to setting new standards in the integration of AI in companies through the upcoming cooperation with Innomatik and the Chat4BI project.

About Innomatik
