

German Association for Real Estate and Facility Managers RealFM e. V. expands working group with focus on digital solutions in facility management

Adrian Merkel, CEO of speedikon FM, is taking over the management of the extended working group "Digital Solutions in FM" at RealFM e. V. The first meeting of the working group will take place on September 26, 2024 at 3:00 p.m. as a virtual meeting. The aim of the extended working group is to drive digitalization in facility management forward and integrate topics such as artificial intelligence, IoT, digital twins and robotics. Interested members and external experts are invited to register their interest in participating at the RealFM e. V. office.

Bensheim, Germany, June 25, 2024 – In recent years, the importance of Building Information Modeling (BIM) as a central component of digitalization in facility management (FM) has become very clear. As a digital method and important data source for numerous downstream operating processes, BIM plays a crucial role, but should not be viewed in isolation from other technological developments.

With this in mind, the RealFM Executive Committee has decided to expand the existing BIM working group. The expanded working group is now called “Digital Solutions in FM” and is headed by Adrian Merkel, CEO of speedikon FM. Under his leadership, the working group will

also address digitalization topics such as artificial intelligence, the Internet of Things (IoT), digital twins and robotics in addition to BIM.

“I'm looking forward to leading the working group and exploring and evaluating the diverse possibilities of digitalization in FM together with the members,” says Adrian Merkel. “Our aim is to act as an independent compass for digitalization in FM and to identify both opportunities and challenges in this complex field.”

The first meeting of the extended working group will take place on September 26, 2024, at 3 p.m. as a virtual meeting. Interested members of RealFM and external experts are cordially invited to register their interest in participating at the RealFM e. V. office. (<https://www.realfm.de/>)

About speedikon FM

speedikon FM is a pioneering software company that specializes in the digitalization of technical and commercial processes within buildings, data centers, and industrial plants. Since 1997, our company has been providing not just products, solutions, and technologies, but also a comprehensive range of services that empower our customers to optimize their asset-related business operations. Our team at speedikon FM possesses extensive expertise in handling vast amounts of data, complex databases, and seamless integration with existing software and hardware solutions. For additional information, please visit our website at www.speedikonfm.com.
