Bensheim, Germany, July 9, 2026 – The German software company speedikon FM AG welcomed a delegation group from South Africa to its headquarters in Bensheim as part of the "Partnering in Business with Germany" program of the Federal Ministry for Economic Affairs and Energy. The delegation brought together business leaders from a wide range of industries, including energy, engineering, digital services, infrastructure, manufacturing, and sustainable technologies, with a particular focus on energy efficiency.

During the visit, the participants gained insights into the technologies and expertise of the speedikon FM group of companies. Adrian Merkel, CEO of speedikon FM AG, introduced the group's international activities and presented its broad portfolio of software solutions for Facility Management, Corporate Real Estate Management, Data Center Management, photorealistic digital twins, artificial intelligence, and energy data management.

The discussion focused not only on the technologies themselves but also on their practical application in international markets. Participants were particularly interested in how the group's software solutions could support organizations in South Africa as they continue to digitalize operations, improve energy efficiency, and manage increasingly complex technical assets.

The conversation also explored how the solutions of the speedikon FM group are delivered to customers around the world. Today, the group supports customers worldwide both through direct collaboration with global organizations and through an extensive ecosystem of more than 50 international partner companies. This approach combines technologies developed in Germany with local expertise, allowing customers to benefit from trusted support and market knowledge wherever they operate.

The exchange was open and interactive, with participants sharing perspectives on digital transformation, current developments in energy efficiency, and the growing role of intelligent software in industrial environments. The discussion highlighted the increasing importance of integrated digital solutions that connect information across existing systems and provide organizations with greater transparency and better decision-making capabilities.

speedikon FM AG would like to thank the South African delegation for the valuable exchange and the inspiring discussions. The company also extends its appreciation to the Federal Ministry for Economic Affairs and Energy, the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH, and AHP International GmbH, which organized the meeting as part of the "Partnering in Business with Germany" program and made this valuable exchange possible.

About speedikon FM

speedikon FM is a pioneering German software company that specializes in the digitalization of technical and commercial processes within buildings, data centers, and industrial plants. Since 1997, our company has been providing not just products, solutions, and technologies, but also a comprehensive range of services that empower our customers to optimize their asset-related business operations. Our team at speedikon FM possesses extensive expertise in handling vast amounts of data, complex databases, and seamless integration with existing software and hardware solutions.
