

speedikon FM AG at Swiss FM Day 2026 in Zurich

speedikon FM AG joined the second edition of Swiss FM Day as a Silver Strategic Partner of IFMA Switzerland. The event brought the Facility Management community together in Zurich to discuss how people, technology and sustainability are shaping the workplaces of tomorrow.

Bensheim, Germany, September 21, 2026 – Swiss FM Day returned to Zurich for its second edition on September 17. Held at the Papiersaal & Folium, the event welcomed professionals from across Switzerland as well as international guests from the IFMA network for a day of presentations, panel discussions and personal exchange.

Under the theme “The Human-Centric Workplace,” the programme explored the changing role of Facility Management and the development of future working environments. New workplace concepts, changing user expectations and the growing importance of data, technology and sustainability were among the topics addressed throughout the day.

These themes provided a natural starting point for conversations at the speedikon FM AG stand. Experts presented the latest developments in **speedikon® C**, the company’s software platform for managing buildings, real estate, technical assets and related operational processes. Visitors were able to see current functionality in practice and discuss concrete use cases with the team on site.

Visitors could also learn more about the extensive solution portfolio of the speedikon Group as a whole. Its areas of expertise include Facility Management and Corporate Real Estate Management, energy and resource management, Data Center Management, photorealistic digital twins and artificial intelligence. This broader perspective provided an opportunity to explore how different technologies and applications address requirements across buildings, real estate, data centers and industrial environments.

The strategic partnership with IFMA Switzerland reflects speedikon's close connection with the Swiss industry and its involvement in the professional dialogue around its continued development. Swiss FM Day offered an ideal setting to strengthen these connections and gain new perspectives on the topics currently shaping the market.

speedikon FM AG would like to thank IFMA Switzerland, everyone involved in the organization and all those who visited the stand for a successful event.

About speedikon FM

speedikon FM is a pioneering German software company that specializes in the digitalization of technical and commercial processes within buildings, data centers, and industrial plants. Since 1997, our company has been providing not just products, solutions, and technologies, but also a comprehensive range of services that empower our customers to optimize their asset-related business operations. Our team at speedikon FM possesses extensive expertise in handling vast amounts of data, complex databases, and seamless integration with existing software and hardware solutions.
