

speedikon FM AG welcomes delegation group from Kenya in Bensheim

German software company speedikon FM AG welcomed representatives of 21 Kenyan companies to its headquarters in Bensheim as part of the “Partnering in Business with Germany” program. The visit provided insights into the solutions and technologies of the speedikon FM group and opened discussions on their application in the Kenyan market, including opportunities in energy management and sustainability.

Bensheim, Germany, October 14, 2026 – The German software company speedikon FM AG welcomed a business delegation from Kenya to its headquarters in Bensheim as part of the “Partnering in Business with Germany” global program of the Federal Ministry for Economic Affairs and Energy.

During the visit, representatives of speedikon presented the group of companies and its comprehensive portfolio of software solutions. The presentation covered Facility Management and Corporate Real Estate Management, Energy Management, Data Center Management, photorealistic digital twins and current research in artificial intelligence. Using examples from different application areas, the team demonstrated how these solutions can support the management of buildings, real estate, technical assets and industrial environments.

A particular focus of the exchange was the question of how internationally established software solutions can be adapted to the requirements of the Kenyan market. The discussions addressed the importance of considering local conditions, operational needs and market-specific priorities when introducing digital technologies.

The participants raised numerous questions, leading to a lively exchange about possible applications and approaches to implementation.

Sustainability was another important topic. The team introduced *WiriTec® C*, the group's software solution for energy and resource management, which enables organizations to collect, monitor and analyze energy consumption data. The subsequent discussions addressed how such capabilities can support more efficient resource use and contribute to environmental, social and governance (ESG) goals.

The numerous questions and discussions throughout the visit reflected a strong interest in the practical application of digital solutions. For both sides, the meeting offered an opportunity to exchange perspectives on current challenges and explore how technology can address different operational requirements.

speedikon FM AG would like to thank the Kenyan delegation for the valuable discussions, as well as the Federal Ministry for Economic Affairs and Energy and the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH for their role in the “Partnering in Business with Germany” program.

About speedikon FM

speedikon FM is a pioneering German software company that specializes in the digitalization of technical and commercial processes within buildings, data centers, and industrial plants. Since 1997, our company has been providing not just products, solutions, and technologies, but also a comprehensive range of services that empower our customers to optimize their asset-related business operations. Our team at speedikon FM possesses extensive expertise in handling vast amounts of data, complex databases, and seamless integration with existing software and hardware solutions.
